

**Digistor published an article**

**February 27, 2006**

Digistor an Australian distributor of Cinema 4D program published an article about my work. Cinema 4D is a 3D program made by Maxon. I used the same program for my 3D fashion collection *Opening of the Papaver Rhoetas*.

The screenshot shows the Digistor website interface. At the top, there is a search bar and a 'Reseller Login' link. The main header features the Digistor logo and the tagline 'Innovative excellence in Digital Storage Solutions'. Below this is a navigation menu with links for Products, News, Events, Services, About Us, Reference Sites, and Mailing List. A secondary menu includes Hardware, Software, Solutions, and Clearance. The 'Products' section is active, displaying a list of software categories on the left sidebar, including Adobe, Apple Software, Autodesk, AVID Software, Disk Utilities, Generic software, Maxon - Architectural, Maxon - Body Paint, Maxon - Cinema 4D, Maxon - Engineering, Maxon - Modules, Maxon - Other, Plug-ins, and SAN software. The main content area is titled 'Maxon - Cinema 4D' and includes a link to browse the product list. The featured product is 'CINEMA 4D R9.5', described as 'Professional 3D Just Got Easier!'. A testimonial from Jana Rot is included, along with a 3D rendered image of a woman in a red dress.

**CINEMA 4D R9.5**

**Professional 3D Just Got Easier!**

CINEMA 4D R9.5 offers you more possibilities than ever before, whether for film, television, advertising, scientific simulations, architecture, product design or any other field that demands professional results. Its one-of-a-kind modular system and the ease with which it can be learned make CINEMA 4D R9.5 the ideal tool for any purpose and every budget.

CINEMA 4D offers you an interface and workflow that allow you to concentrate on the creative process completely, without having to worry about technical details.

**FASHION INDUSTRY:**

*"The concept of combining superb design with 3D tools could and should be the future of fashion design."*

*"I was amazed at the number of new design ideas that came out of just using CINEMA 4D! I discovered new problems and even better, new design solutions. After 6 months of learning modeling tools, theory behind materials and BodyPaint 3D, I began modeling my own clothes and accessories. It took me another six months to create the whole collection in extremely high detail, with high-resolution textures. Luckily, CINEMA 4D is an extremely stable piece of software so I was able to focus on the design instead of focusing on finding solutions to software bugs and crashes. CINEMA 4D it works fantastic on a PC and Mac!"*

- Jana Rot

**Digistor** is an Australian company established in 1990, coinciding with the growing popularity of non-linear film and television edit suites, Digistor was created to cater for the high capacity storage requirements that came with this new non-linear age.

Since then through superior knowledge and comprehensive technical support of all non-linear systems, Digistor has carved a reputation as being the "Leaders in Digital Storage Solutions". Today Digistor not only continues to supply high capacity storage solutions, but a comprehensive range of products and services.

**Jana Rot** was born in Kranj, Slovenia. She has started her fashion design career around 1999 and since then she has been involved in various exhibitions, fashion shows and international fashion and industrial design competitions. During her study at University of Ljubljana, department of fashion and textile design, she has been active in researching new ways of creative presentations and thinking regarding fashion and textile design. She has graduated in 2005 under the mentor doc. Marjeta Godler.
